

BEZILLO[®]

SUPERIOR QUALITY PRODUCTS.

BEZILLO EDGE & BOTTOM PROTECTOR

Superior quality water based protector for bottom and edges
of all type of natural stones, quartz, ceramic etc.

BEZILLO EDGE & BOTTOM PROTECTOR

Superior quality water based protector for bottom and edges of all type of natural stones, quartz, ceramic etc.

BEZILLO EDGE & BOTTOM PROTECTOR is a water based protective impregnation for application to the back/fixing side for all polished, honed marbles, granites and natural stone tiles to avoid humidity/moisture based problems such as: shadows, marks or oxidation appearing on the surface of marble, granite and natural stone surfaces after these have been fixed. The easy application of the product creates an excellent bonding surface which facilitates the adhesion to the sand/cement bedding while reducing the water ingress through the back side of the tile.

ADVANTAGES

-  Penetrates deeply into micropores
-  No change in color of the stone
-  No unwanted film residues post application
-  Allows stone to breathe naturally

MATERIAL

- Marble
- Granite
- Natural Stones
- Quartz
- Ceramic

PACKING

1 Lt/Btl

Art No: 99.000.20
